DISPATCH QUICKER, RECONCILE DATA WITH EASE AND REDUCE USER ERROR

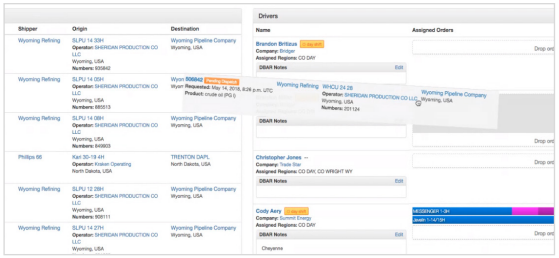
MIDSTREAM LOGISTICS

24/7 LOGISTICS VISIBILITY WTIH A CLICK

Midstream Logistics, based in Houston, TX, is an easy-to-use dispatch and e-ticketing solution that provides unparalleled visibility into your logistics and operations while optimizing your drivers time. Our rapidly deployable mobile solution provides field and back office resources real-time, actionable data such as asset location, truck utilization, strapping tables, and hauled volume, ultimately reducing costs and increasing operational efficiency and improving safety within your organization.

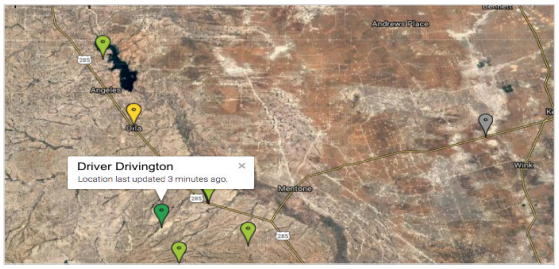
- Easy-to-use functionality that optimizes drivers time
- Data transparency enables easy reconciliation
- Built-in intelligence to clearly surface anomalies for accuracy and timely resolution
- Easy strapping table input
- 24/7 full, in-house support team
- Rapid deployment with drivers and office personnel in weeks vs. months

DISPATCH DASHBOARD



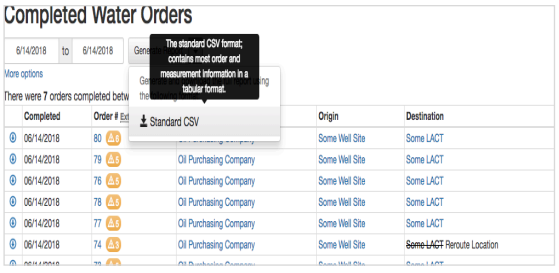
- Quickly view all open orders with drag and drop functionality to allocate orders to drivers
- Intuitive drill downs to gain insights such as real-time driver location and status, order details, and more

REAL-TIME TRACKING



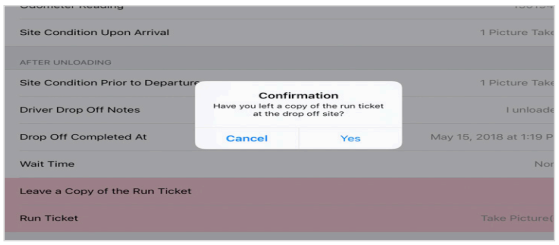
- Track assets in real-time from pick-up through drop-off
- Immediate visibility into run details, including freight and fuel surcharge rates, and barrels awaiting pick-up, in transit, and unloaded
- View more routes, driver and tractor/trailer details per run

REPORTING & DATA INTEGRATION



- Custom reporting for in-house or operator use
- Gain operational insights and view action-able data such as truck utilization for future planning
- Capable of 3rd party API integration (i.e. ELD, TMS, etc)

INTUITIVE WORKFLOWS & IMPROVED SAFETY



- Improve data accuracy via intuitive workflow
- Drive consistent operational processes across multiple carriers
- Consolidate all transactional field data for full operational visibility
